

Data. Intelligence. Solutions.

We turn ideas into scalable web, mobile, cloud, and enterprise software — with database excellence, AI, and full-stack craft.

Custom software and APIs

SQL Server data platforms

Azure and AWS delivery

AI image editor in the browser

Crop, retouch, remove backgrounds, erase objects, stack layers, make birthday cards, and prepare official passport photos.

Privacy-first: work stays on the device

Server fallback only if a browser model cannot run

India, Ireland, UK, US and more ID sizes

PDF merge, edit, OCR, e-sign

Combine, split, compress, convert Word / Excel / PowerPoint / JPG, watermark, unlock, and OCR — up to 100 MB per file.

No document archive

Ephemeral processing

Share links expire automatically

LiveTranslate in real time

Speak once and be understood. Live voice translation for conversations, meetings, classrooms, and shared rooms — captions, spoken output, and broadcast links.

Microphone capture as people talk

Spoken output for hands-free travel

Broadcast rooms and session history

Web, database, mobile, cloud

React, Angular, .NET, Python, Flutter, SQL Server, Azure, AWS, Firebase, Docker. Senior delivery for startups and enterprises.

Web and mobile applications

Database architecture and migration

AI automation that cuts cost

LET'S TALK
